The RecallWire Platform

Real-time Alerts Engine

- Screens FDA and non-FDA notices
- Prioritizes urgent events
- De-duplicates and enriches

Targeted Matching

- Matches to POs, item masters, inventory
- Confidence scoring

Smart Routing & Escalations

- Auto-notify by facility/departement
- SLAs, reminders, escalations

Guided Resolution

- Holds/removals/quarantines/returns
- Photos, notes, dispositions

Reporting & Dashboards

- Org-wide and site-level views
- Time-to-ack, time-to-close, compliance
- PDF/Excel exports

Audit-Ready Records

- Digital trail per event
- Role-based sign-offs

Value, built for scale

RecallWire Assistant

Ask about recall identification, regulatory steps, or action planning.

I can help you with:

- Understanding medical device identifiers and codes
- Recall management procedures and best practices
- Regulatory compliance questions
- Risk assessment guidance
- Inventory management for recalls

What is a UDI-DI number and why is it important for recalls?

How should I prioritize actions when multiple devices are recalled?

What information do I need to track for each recalled device?

What is a UDI-DI number and why is it important for recalls?

Send

RecallWire Assistant

Guidance on codes, regulatory steps, and action planning.
